SUMMARY

Databricks Certified (4x) **Data Engineer** and Data Specialist with 13+ years of experience in **Data Engineering, Data Analytics**, and Fraud Analytics. Proven expertise in designing scalable **data models**, developing **data transformation logic**, and delivering enterprise data solutions for risk and fraud detection. Experienced in translating complex business and regulatory requirements into high-quality data assets, scalable data pipelines, and analytical solutions. Strong expertise in **SQL, Python, PySpark, Azure Databricks, Azure Data Factory, Azure Synapse Analytics**, and **distributed data processing**. Currently pursuing a Master's in Data Science & AI, specializing in AI-driven data solutions.

SKILLS

Programming Languages: Python | SQL | PySpark (RDDs, DataFrame API, Spark SQL)

Big Data Technologies: Apache Spark | Hadoop (HDFS, Hive) | Delta Lake | Structured Streaming

Azure Data Platform: Azure Databricks | Azure Data Factory (ADF) | Azure Synapse Analytics | ADLS Gen2

Databricks: Unity Catalog | Delta Live Tables (DLT) | Auto Loader | Lakehouse Federation | SQL Warehouses

Data Engineering: ETL/ELT Data Pipeline Development | Data Migration | Data Transformation | Distributed Data Processing | Batch Processing | Data Modelling | Dimensional Modelling | Data Quality | Unit Testing | Performance Optimization

Databases: SQL Server | MySQL

Version Control & DevOps: Git | GitHub | Azure DevOps | CI/CD

Data Visualization: Power BI | Tableau | Microsoft Excel | Apache Superset

Project & Delivery: Agile (Scrum) | JIRA | Confluence | Documentation | Requirement Gathering

EXPERIENCE

Sr. Consultant II – Big Data Services

Capco Technologies | Jul '24 - Present | Pune, India

- Designed, develop and enhanced **Conceptual Data Assets (CDAs)** for fraud detection use cases, translating business and regulatory requirements into scalable data solutions.
- Developed **data models** and risk-indicator-driven attribute frameworks to support fraud analytics and downstream data engineering pipelines.
- Translated business requirements into SQL and Python **transformation logic** to **build scalable ETL/data pipelines**.
- Performed **unit testing, data validation**, and quality assurance to ensure the accuracy, consistency, and reliability of engineered datasets.
- Supported market expansion initiatives by adapting data models, fraud detection logic, and analytical frameworks across multiple regions.
- Conducted exploratory data analysis to identify fraud patterns, behavioral trends, and actionable business insights.
- Partnered with Business, Data Engineering, and Data Science teams to deliver end-to-end fraud analytics and data-driven solutions.
- Led the design and operationalization of a fraud detection use case that prevented **\$46M+** in potential financial losses and enabled proactive blocking of **600+ high-risk accounts** across multiple regional markets.

Senior Data & Analytics Engineer

Kadel Labs | Jun '23 - Jul '24 | Bengaluru, India

- Developed **optimized SQL views** and KPI dashboards in **Apache Superset** for performance monitoring and decision support.
- Performed **data cleaning, transformation**, and **validation** to ensure reporting accuracy and data integrity.
- Analyzed large-scale operational and financial datasets to generate actionable insights for business stakeholders.
- Automated MIS reporting workflows and improved reporting efficiency using SQL and Python.

Lead - Data Analytics

Concentrix | Jan '23 - Jun '23 | Bengaluru, India

- Analysed and categorized global incident data using **Python, NLP, and Text Analytics** to identify trends, improving issue resolution time by 25%.
- Developed MIS reports and interactive **Power BI** dashboards, including forecasting models to support business planning and decision-making.
- Automated Excel-based MIS reporting using Python, reducing manual effort by 90% and improving reporting efficiency.

DataOps Engineer

Tata Consultancy Services | Mar’18 – Dec’22 | Bengaluru, India

- Managed **end-to-end ETL workflows**, ensuring seamless BAU operations across enterprise data platforms.
- Extracted, ingested, and validated transactional and non-transactional data from multiple source systems into landing zones, ensuring data quality, consistency, and accuracy.
- Performed root cause analysis of production failures and **resolved ETL/data pipeline issues** within defined SLA timelines.
- Supported **Data Warehousing, Data Ingestion, and Data Movement** processes to ensure reliable data availability for downstream systems.
- **Monitored production ETL pipelines**, managed incidents, alerts, and change requests (CRs), ensuring timely and reliable pipeline execution.
- Prepared monthly service review reports and dashboards, presenting operational KPIs, SLA metrics, and production performance to stakeholders

Data Analyst

Tata Consultancy Services | Nov’12 – Feb’18 | Kolkata, India

- Reconcile the accounts based on statement received from customers against the invoice posted in system
- Provide resolutions against the Vendor Queries
- Raising EFT
- MIS Reporting using Excel Creating and Analyzing Monthly Payments Reports & Dashboards
- Team Handling, Team Management.

PROJECTS

Mule Network Detection Framework

- Designed and developed Conceptual Data Assets (CDAs) by performing **data modelling** and **data analysis** to support enterprise-scale mule network detection and fraud analytics.
- Engineered risk-indicator-driven data models and behavioural attributes to identify suspicious transaction patterns, linked accounts, shared devices/IPs, transaction velocity anomalies, and fund movement networks.
- Developed **optimized, production-ready SQL transformation** logic to generate scalable fraud detection datasets for downstream **ETL and data pipeline development**.
- Collaborated with **Business, Data Engineering, and Data Science** teams to translate business and regulatory requirements into reusable, high-quality analytical data assets.
- Contributed to a fraud detection framework that enabled proactive blocking of **600+ high-risk accounts** and **prevented over \$46M** in potential financial losses across multiple regional markets.

EDUCATION

M.Sc. Data Science & AI (EU Global)	In-Progress
M.Sc. Physics (Mahatma Gandhi Kashi Vidyapith)	2010 — 2012 Varanasi, India
B.Sc. Mathematics (VBS Purvanchal University)	2007 — 2010 Jaunpur, India

CERTIFICATIONS

Databricks Certified **Machine Learning** Associate | May 2026
Databricks Certified **Data Analyst** Associate | Feb 2026
Databricks Certified **Data Engineer** Associate | Feb 2026
Databricks Certified **Generative AI** Associate | Aug - 2025
